

Our Biliteracy Philosophy

In order to help our students meaningfully participate and show growth **in L, S, R, W in both languages**, we will systematically move through **experiential learning** that builds ***oracy*** and ***background knowledge*** to begin developing literacy proficiency and comprehension.

This will be done by scaffolding rigorous activities and using a gradual release of responsibility model (whole group, small group, independent practice) that meets student needs and is developmentally appropriate and that takes 5 to 7 years to develop.
